

# Get the Most Out of Homework

## Problem-Based Strategy

For problem-based homework, follow the five steps below to prepare for exams with a more time-effective method.

- 1 FOCUS** on how to work problems in class, rather than the answer.
- 2 REVIEW** text and notes before starting homework.
- 3 REWORK** examples from class and the text first.
- 4 WORK** homework out of order to simulate the test.
- 5 LOG** questions and steps for working each problem.
