

Fun Fungi Facts!

Kingdoms

Plantae (plant)

Animalia (animal)

Fungi

Did you know Fungi are in a kingdom of their own? They are considered separate from the animal and plant kingdoms!

Yeast growing in a jar

Did you know that without fungi, we would be eating flatbread? Yeast is a type of fungus (*Saccharomyces cerevisiae*) that “eats” sugar and produces gas to make our bread rise.

The most expensive fungi in the world is the caterpillar fungus (*Cordyceps Sinensis*)? It can sell for \$50,000 a pound!

Cordyceps Sinensis next to a match to show how small it is!

Did you know Fungi can save lives? Penicillin is produced from a mold that is a fungus (*Penicillium chrysogenum*). In 1924 Dr. Alexander Fleming discovered penicillin by accident. This would save many people’s lives from infection!
